Machine Test – Day 4 Shell Scripting (Loops)

Submission: GitHub Repository + Screenshots of Output

Task 1 – Number Generator

Create numbers.sh. Use a for loop and print numbers from 1 to 20, one per line.

Task 2 – Environment Folder Creator

Create environments.sh. Automatically create folders: Dev, Test, Stage, Prod.

Task 3 – Log File Generator

Create logs.sh. Create Day1.log through Day7.log using a loop.

Task 4 – While Loop Counter

Create counter.sh. Use a while loop to print numbers from 1 to 10.

Task 5 – Break Example

Create breakdemo.sh. Loop from 1 to 10 and stop when the value becomes 6 using break.

Task 6 – Continue Example

Create continuedemo.sh. Print numbers from 1 to 10 and skip number 5 using continue.

Task 7 – List All Text Files

Create showfiles.sh. Create at least 3 .txt files and display them using: for file in *.txt

Task 8 – Mini DevOps Automation

Create backup.sh. Create Backup_Day1 through Backup_Day7 using a loop.

Submission Structure

day4-machine-test/
■■■ numbers.sh
■■■ environments.sh
■■■ logs.sh
■■■ counter.sh
■■■ breakdemo.sh
■■■ continuedemo.sh
■■■ showfiles.sh
■■■ backup.sh

Submission Instructions

1. Push all scripts to GitHub.
2. Include screenshots showing successful execution of each script.
3. Repository name: day4-shell-machine-test
